Enterprise

Insel Gruppe is a network of hospitals comprising the Inselspital and the Spital Tiefenau in Bern, as well as the four regional hospitals in Aarberg, Belp, Münsingen and Riggisberg. Together, these six traditional hospitals make up Switzerland's largest comprehensive health care system: ranging

from highly specialised medical treatments to the provision of primary health care. In this way, we ensure that every patient receives the best possible care and is treated at the appropriate location and according to the latest developments and methods.

Employees

In order to ensure the successful continuation of Insel Gruppe as a renowned research and development centre, we rely on both male and female specialists from roughly 95 nations.

We embrace diversity and equal opportunity. We promote a corporate culture in which all our employees are involved and feel integrated and equal.

10,780 competent and motivated employees are committed to medicine, nursing, service, infrastructure, administration, teaching and research for the well-being of patients and visitors alike.

We attach a high priority to humanness, professional competence and reliability. Excellent treatment, care and service coupled with high-quality standards are manifest in our employees' daily work.

Insel Gruppe is a social employer. It assumes responsibility for the individual training and further education of its employees, while supporting and respecting a meaningful way of balancing their professional and personal lives.

Employees according to occupational groups in full-time units
100 %: 8471 excluding trainees (73 % women; 27 % men)

Business strategy

Our strategic approach is based on our vision, our mission, our values and our six group-wide strategic corporate goals. Patients, along with research, teaching and innovation, are at the very heart of our corporate strategy.

Patient orientation
We optimise our services while continually taking into account the needs of our patients and their dependants.

Quality leader
By cultivating a culture of quality and safety, Insel Gruppe attains the highest level of results throughout Switzerland.

Employees are key to success
Our employees and their specialist expertise are the key success factors for Insel Gruppe.

Digital medicine
Insel Gruppe is working to become the pioneer in digital medicine by 2022.

Innovation, diagnostics and therapy
Insel Gruppe stands out from its competitors due to innovations in diagnostics and therapy across its locations.

Age and health
Insel Gruppe has an age-appropriate infrastructure and focuses on the medical treatment and needs of elderly people, as well as multi-morbidity, chronic diseases and dementia.

Vision

We aim to be one of the world's leading hospital groups for university and integrative medicine by providing patients with comprehensive healthcare based on quality, pioneering research, innovation and education.

Mission

We have enhanced people's health and quality of life since 1354:

- by offering to patients at all stages of life, around the clock and in the right place, high-quality medical services
- by conducting innovative research and translating our findings into practice for the benefit of our patients
- by offering education, training and continuous professional development in our multifaceted professional fields
- by striving for simplicity and sustainability in our daily work
- by cultivating our networks and creating added value together with our cooperation partners
- by ensuring interdisciplinary and interprofessional cooperation
- by attracting competent and dedicated staff members as a preferred employer

Together we are strong.

Values

Our values guide our professional activities and decision-making.

Humanness
Respect and a high regard for the individual are central to everything we do.

Quality
Our actions comply with the highest standards of quality and safety.

Cooperation
We treat one other with respect, cultivate professional cooperation, promote interdisciplinarity and appreciate each other.

Competence
We have confidence in our abilities and share our knowledge for the benefit of all our patients.

Innovation
We seek new approaches as well as promote research and innovation.

Integrity
We are committed to our values and are guided by sincerity, transparency and dependability.
